Welcome to
Fishstone, Concrete Countertop Supply (CCS),

Fishstone is a leader in supplying the decorative concrete professional tools and supplies used in making concrete countertops and architectural elements.

What makes **Fishstone** different from other suppliers is our simple and proven approach. Our mission is to sell the best quality products at an affordable price to the concrete countertop industry. Truly a one stop shop, **Fishstone** is focused on the concrete countertop contractor and not distracted by other industries such as granite, solid surface countertops or concrete flatwork. We don't spend a lot on advertising or marketing but prefer to pass on the savings to you, our customers. We also sell products that traditionally have only been offered in bulk and have them repackaged into more manageable sizes which make more sense for our industry.

At **Fishstone** we not only distribute products to the concrete countertop professional but we also use the products we sell. What does this mean for you? We aren't relying on a salesman's word that their products are the best, but rather have chose to use our products daily based upon quality and performance.

When looking for manufacturers and suppliers who might cater to the concrete countertop industry we were amazed by how few we found. Most distributors carry similar types of power tools and polishing supplies but they are geared toward the stone fabricator. Machine speeds and the matrix of your pads do make a difference. There is an article detailing what to look for in your pads on page 3 of our catalog. Let's face it, we all want optimal performance and supplies that are affordable.

We would like to invite you to look through the following pages to find quality products that fit our industry at the right price. If you don't find what you are looking for, we are more than happy to source and either order for you or point you in the right direction. We work with many vendors on special orders. Whether it be shop equipment like sanders and table saws or concrete admixtures and fabrication tools. We encourage you to shop around for yourself and compare our prices.

Tom & Carrie Fischer

1 year warranty
On all Flex tools

Heavy Duty Variable Speed Wet Polisher \$419.95

Item #WP50603

- 13 Amp electronic variable speed motor
- Infinitely adjustable (1,000-2,800 RPM)
- 7.5 lbs.
- Central water feed and GFCI built in

5" Compact Wet Polisher

\$269.00

Item #WP51503

- 7.4 amp single speed motor
- 3,700 RPM
- Only 4.4 lbs
- Central water feed and GFCI built in

Extreme Duty Wet Polisher

\$578.00

Item #WP51302

- 13 Amp single speed motor
- 2,000 RPM, the perfect speed for concrete
- Rugged metal composite housing
- Central water feed and GFCI built in

Heavy Duty Metal Housing insuring years of operation. You'll be able to hand this tool down to your grandkids.

Variable Speed Edge Milling Machine

\$795.00

Item #EM11506

- 11 Amp variable speed motor
- 2,200-6,500 RPM
- For profiling straight and curved edges
- GFCI built in

7" Heavy Duty Variable Speed Polisher

\$271.00

Item #DP70603

- 10 Amp electronic variable speed motor
- Infinitely adjustable (1,000-3,000 RPM)
- 7.5 lbs
- Ideal for wax finishes

NEW

Flex PLW923S Pneumatic Polisher

- Variable speed up to 3,600 max RPMs
- Lightweight, only 2.8lbs
- 15.19 CFM at 90PSI
- 1/4" air inlet and hose size
- Central water supply & rear exhaust
- 1 year manufacturer warranty

\$249.95

L 3406 VRG

Compact, High Performance
5" Variable Speed Sander/Polisher
388.027

Flex, 5" Variable Speed Sander/Polisher

- 11 Amp variable speed motor
- 2,100-6,400 RPM
- FLEXgrip-the multi-handle
- Patented Safety Disc Guard with easy adjust

\$199.95

BHW 1549 VR

Flex FLEX blind hole-B-H with
integrated water supply
388.027

Flex, Blind hole drill w/ integrated water supply

- 11 Amp variable speed motor
- 3,000-9,000 RPM
- Comes with metal case and easy adjust splash guard
- GFCI built in

\$295.00

NEW

**FLEX 12" LCP 1703 VR
planetary gear driven 3-headed polisher**

\$2,150.00

Features:

- High quality Helical gears
- Belt driven design for quieter operation and less heat buildup
- Slurry guard brush design for clean and easy movement
- Dial in water adjustment
- 10 Amp variable speed motor w/ built in GFCI protection
- 1 year manufacture warranty
- Uses 3-5" pads
- 29 lbs, the perfect weight for proper grinding/polishing
- Diver speed 1,100-3,400 RPM
- Platen Speed 600-1,900 RPM
- Platform Speed 157-481 RPM

Add 3-Full sets of Matador Pads to the new Flex planetary polisher and save over \$300 on this bundleBundle Price \$2,550.

12" Interplanetary Wet/Dry Polisher

Item #PP50301 Model DS 301

- Powered by heavy duty Fein Polisher
- Includes 3 aluminum backer pads and slurry skirt
- Variable speed (900-2,700 RPM)
- Planetary, gear-driven tool
- 12" platform turns at a lower rate than the higher rotational speed of the 5" platens

\$1,935.00

Choosing the right pad

Choosing the right pad for polishing concrete countertops can be a confusing process especially when most pads are designed for materials other than concrete.

First and perhaps most important let's look at the matrix holding together the diamond on a polishing pad. Concrete (especially if the concrete is less than 28 days old) is a very abrasive material to polishing pads. Abrasive material floats on the surface when polishing, acting as sand paper to the resin binder, wearing them down. Using a pad with a harder binding matrix designed for concrete will not only increase the longevity of the pad but will produce a better finish. An overall rule to remember is to polish soft concrete (less than 28 days old) use a pad with a hard matrix. If you are polishing a very hard surface like granite use a pad with a softer matrix.

Another thing to consider is size. The majority of the pads on the market today are sold to granite, marble or solid surface countertop fabricators. In those industries fabricators take a polished piece of stone and cut to size. They only need to polish the edges so they look for small pads which work well on thin edges. It is very difficult to produce a truly flat polished surface on a concrete countertop with a small 4" pad. Plus it can take a long time to cover the entire top of the countertop and let's face it...time is money. When polishing large surfaces look for a pad size no smaller than 5". Better yet, invest in an interplanetary polisher which can reduce your polishing time five fold and create a truly flat swirl free surface. Another option to consider is using a 7" pad on large surfaces. Just be sure the polisher is rated to polish with 7" pads other wise you can burn out the motor of your polisher prematurely.

All the pads that we sell are designed for use with concrete and will give you excellent performance when teamed with the correct polisher. Ideally you should use a central water feed polisher to reduce heat and friction which will wear down any polishing pad faster. Polisher speeds should be between 1,000-3,000 RPMs. Running closer to 3,000 RPM will polish faster, however you will loose pad life especially with lower grit pads.

Poly Blue Concrete Polishing Pads

- Each Poly Blue Concrete Polishing pad contains thousands of micro-sized diamonds uniquely impregnated into a poly scrubbing pad. Poly Blue Concrete pads are designed to revitalize the gloss and depth of dull concrete surfaces sealed or unsealed / new or old. Attaches easily to any hook & loop backer plate and can be used on hand held or floor polishing machines. Poly Blue Concrete polishing pads can be used on bare concrete and to even out and soften sealed concrete. Very flexible and can be used as a hand pad. Wet or Dry use. Comes in steps 1-4.

The "DragonFish" 8mm Thick Concrete Polishing Pads

If your looking for a thick heavy duty pad look no further. The DragonFish are a full 8mm in thickness and developed specifically for concrete surfaces. The 5" pads work well on the Interplanetary Wet/Dry Polisher listed on page #1 where the 7" make a great alternative to the planetary polisher while using the Extreme Duty Polisher on page 2.

Sink Polishing Shaft Extension set
\$68.95
 Item #LR2001

- Set comes with one each 1" & 2"
- Allows access in the tightest areas with your wet polisher
- Ideal for polishing the inside of sink bowls
- Use in conjunction with X-Thick Backer and Super Flex pads
- Labor saving, no more hand polishing the inside of sinks
- Use multiple extensions for longer lengths
- For wet or Dry use, 5/8-11 thread

Profile Wheels

- These profile wheels fit on any hand held grinder with the 5/8"-11 attachment
- The top spacer allows you to work manually keeping the wheel perfectly aligned with the slab edge
- Long lasting Stainless steel bearings (last the life of the tool. More than twice as long as nylon bearings)
- The bottom guide bearing guarantees a consistent and even shape

3/4" Ogee profiler
 Item #PW00434

\$158.95

Also available in 1 1/4"
 (Call for pricing)

3/8" round over profiler
 Item #PW00138

\$124.95

Also available in

 (Call for pricing)

3/8" 45° Profiler
 Item #PW00238

\$124.95

Also available in
 3/16", 5/8", 3/4", 1 1/4"
 (Call for pricing)

4" Aluminum Turbo Cup Wheel –Resin Filled \$69.00

Item #AR40001

- The aluminum body makes this cup wheel light and easy to handle
- The added resin helps dampen vibrations and resists chip out when chamfering edges

Steel Body Turbo cup wheel

- Aggressive cutting action to remove a lot of material fast
- Perfect for exposing aggregate
- Can be used wet or dry

4"	5"
#TC40001	#TC50001
\$69.95	\$94.95

5" Full Face Disc, 50 Grit \$79.95

Item #FF50050

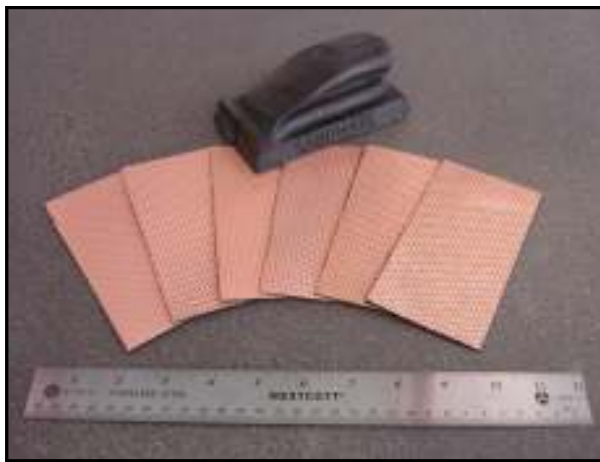

- The perfect tool to have at every installation
- Amazing 2 in 1 tool
- Cuts and grinds for maximum efficiency
- The fully exposed diamond allows you to remove material with little effort
- The two sided diamond wrap allows you to use both sides of the blade for grinding

50 Grit	HP30050	\$18.95	Electroplated

400 Grit	HP20400	\$15.95
600 Grit	HP20600	\$15.95
Full Set W/ rubber handle	HP20SET	\$129.95

- At 2 3/4" x 5" these hand pads are nearly twice the size of most hand pads giving you more for your money.
- Flexible backing ideal for complex shapes
- Often used like sandpaper
- Velcro backed for quick load and release

Velcro sander w/ rubber handle, 2 3/4" x 5" \$13.95

Item #HP20001

- Use with Flexible Velcro Hand Pads listed above

OPTIMUM
Premium Superplasticizer

	1 Quart	1 Gallon	5 Gallon
Optimum 380 Premium Superplasticizer	\$18.95	\$38.95	\$159.95

- Modified polycarboxylated high range water reducing admixture formulated to produce self-compacting type (S.C.C.) concrete with extremely high spread rates
- High early strengths with improved densification of surfaces
- Improves workability and greater fluidity with reduced or minimal vibration
- Improves dispersing action resulting in concrete with “self placing” properties
- Very low water to cement ratios can be obtained with as much as 25-30% total water reduction.
- Improves flow (self leveling) with self-healing rheology
- Recommended Dosage: 3-5 ounces per 100 lbs. of cement (56 –93 ml/100 kg)

Supercizer 7 Super Plasticizer, 2.5lb bag \$16.95

Item #SP70007

- Designed for very high early and ultimate strength with smoothest possible finish
- Up to 40% water reduction
- Improves concrete workability
- Produces concrete with lower permeability
- Dosage is .25% - .75% of total cementation material

Counter Flow, 8lb Jar \$52.50

Item #CF80004

- A mixture of water reducers and mineral admixtures specifically designed for use in the production of concrete countertops
- Makes concrete more fluid with less water therefore strengthening concrete
- Reduces cracking & produces a smoother finish
- Makes concrete easier to place
- Dosage 2oz per 20lbs of cement (.5-1.5%)

Retarder 5.3 oz bag \$2.95

Item #NR53053

- Concrete may be kept in a plastic state for extended time (usually 1 hour)
- Aids in clean up of mixer
- Excellent for use in hot summer months
- Does not affect color or strength of concrete
- Dosage is four 5.3oz bags per 100lbs of portland

Non-Chloride Accelerator

- Speeds up concrete set-time
- Provides higher early strength
- Ideal for slurry mix
- Dosage is 1%-3% by weight of cement

	5.3oz bag Item #NA53055	5 lb bag Item #NA50055
	\$2.95	\$15.95

Air-Minus 1.1 lb bag \$9.95

Item #D95000

- Air-Minus is a dry powdered defoamer for use in dry blended material, or for wet/plastic concrete. It decreases foaming and minimizes air entrainment in cement slurries, grout, concrete and mortars, It can also be used to counteract the air entrainment caused by water reducers and plasticizers.
- Maintains slurry densities
- Recommended Dosage is 0.1% to 0.5% by weight of the cement

Air-Plus 8 oz bag \$4.50

Item #

- Air-Plus is a dry powdered admixture. Air Plus is recommended for all types of air entrained concrete when an increase in entrained air content is necessary.

Super Slump Buster, 8oz bag \$9.95

Item #FP97180

- Super Slump Buster is a dry powdered viscosity modifying admixture (VMA)
- Minimizes segregation & permits controlled slump reduction

Control Finish, 18oz bag \$12.95

Item #

- Control Finish improves concrete surface finishing characteristics without re-tempering with water, thus avoiding many common surface problems such as plastic shrinkage cracks, dusting, cracking and crazing.
- Sprayed on lightly and troweled in, Control Finish produces a high quality surface that is easy to finish and extremely durable.

Qwix®

Qwix, 50 lb bag

Item #VCAS25

\$24.50

- A clinker additive used with Portland cement to enhance the physical and chemical properties related to ultra high early strength and durability.
- Replace up to 60% of Portland for varying set times

VCAS Micron-HS, 50 lb bag

Item #VCAS25

\$28.95

- Used as a Portland replacement (up to 30%)
- Increases strength and hardness of concrete
- Decreases efflorescence
- Increases workability of fresh concrete

Metakaolin, 40 lb bag

Item #MT40001

\$29.95

- Used as a Portland replacement (up to 20%)
- Increases strength and hardness of concrete
- Decreases efflorescence
- Increases workability of fresh concrete

PVA Reinforcing Fibers, 5 lb bag

Item #PV50001

\$42.50

Why PVA over other fibers for countertops

PVA fibers are a new, high performance fiber for concrete. Like steel, these PVA fibers have high tensile strength and a greater modulus of elasticity than regular concrete. Unlike steel, PVA fibers develop a molecular and chemical bond with the cement during hydration and curing. This high bond strength makes PVA fibers very tough to pull out during bending or tension. Studies published by University of Michigan researchers demonstrate PVA engineered cementitious composites with tensile strain capacity of 5% approximately 500 times that of normal concrete or fiber-reinforced concrete.

Microspheres, Small - size .1-.3mm

- Ideal for slurry mixes

5 lb bag, Item #MS50005 \$23.95

40 lb bag, Item #MS40005 \$160.00

- Ideal for slurry and light weight mixes
- Uniform in color (off white) will not affect color of light mixes
- Reduces "stickiness" of concrete

Microspheres, Large - size .25-.5mm

- Ideal for light weight mixes
- (approx 12lbs large microspheres = 50 lbs sand replacement)

5 lb bag, Item #MS50001 \$23.95

40 lb bag, Item #MS40001 \$160.00

Eccorok Binder, 50lb bag

- *Eccorok is the first and only concrete material to offer over 98% recycled content and nearly zero CO₂'s. Achieve over 9,000PSI & Zero ASR issues.*

1-9 bags, \$42.50 each

10-26 bags, \$40.25 each

27-53 bags, \$38.25 each

54 bags(full pallet), \$36.00 each

Eccorok Retarder, 15lb bucket

- *Retards the set of Eccorok*

15lb bucket, \$58.95 each

Polyplex Polymer Curing Agent

- 1 Gallon**, Item #POLYP1G\$34.95
- 5 Gallon**, Item #POLYP5G \$114.95
- 55 Gallon**, Item #POLYP55G..... \$895.95

- Eliminates the need for a seven day wet cure. Strip your forms in 24 hours
- Increases flexural & tensile strength
- Increases impact strength
- Increases Stain resistance
- Decreases concretes permeability helping stain resistance
- Increased workability to the mix
- Helps with adherence to vertical mold surfaces, eliminate slide of wet mix
- UV stable
- Freeze/Thaw stable up to 5 times, eliminating overnight delivery charges in winter months
- **Recommended dosage: 5% polymer solids to cementitious material**

Other uses (not just for GFRC)

- Replacement for water in your slurry mix to minimize shrinkage and cracking
- Use in standard wet cast concrete to minimize curling, increase strength & reduce staining
- Use as a bonding agent for patching or bonding-pad repairs

Compaction Rollers

- Available in many different sizes and shapes
- Used in GFRC applications to remove air pockets between mist/face coat and backer coats
- Made from high density polyethylene for longer life and easier cleaning
- Threaded handle to fit std. extensions

3/8" Corner Compaction Roller

Item #ROLL38.....\$23.00

Compaction Roller 1"x3"

Item #ROLL1X3.....\$23.00

Compaction Rollers

2 Inch Group

2"x3" Roller, Item #ROLL2X3\$38.00

2"x6" Roller, Item #ROLL2X6.....\$40.00

2"x9" Roller, Item #ROLL2X9\$45.00

AR Glass Fibers

3/4" Chopped strand

44lb bag Item #FIBERAR44.....**\$129.95**

- Alkali Resistant (AR) Glass Fibers
- Contains minimum of 19% Zirconia
- Increase Tensile Strength (three times higher than steel)
- High young's modulus
- Small fiber diameter- more individual fibers per pound
- High fiber content possible
- 3/4" fibers will produce stronger concrete than 1/2" fibers

AR Glass Net (Scrim)

10x10mm spacing, 36 Width, cut to length

Item #S10MMFT

99 ft. or less.....\$1.55/ Linear ft.

100 ft. or more..... \$1.25/Linear ft.

300 ft. or more..... \$1.00/Linear ft.

- Conveniently sold in lengths that meet your needs.
- AR glass fibers weaved into netting to provide ultimate strength
- Netting is sold in 36" width cut to your specified length (1 foot increments)
- Alkali Resistant (AR) Glass Fibers
- Contains minimum of 19% Zirconia, many look alike are not alkali resistant
- Increase tensile strength (three times more than steel)
- Increase flexural strength (twice as much as chopped fibers alone)
- Use multiple layers to provide ultimate strength
- Used in GFRC production but works great when high flexibility and strength are needed

2 Gallon GFRC Hopper Spray Gun

Item #BT13172.....**\$84.95**

- Ideal for use with GFRC
- One piece, die cast aluminum body with an air regulator valve
- Large trigger
- Better positioned air hose
- 2-gallon capacity hopper
- Three nozzle sizes included: 4mm, 6mm, 8mm

**Add the stand
\$24.95**

GFRC Depth Gauge

Item #GA2604.....**\$24.95**

- Easily checks the depth of your face/mist coat to insure you have the proper thickness
- Hand tightening set screw locks pin in place
- Accurately measures up to 26mm depths

Poly Drum Mortar Mixer W/ Electric Motor

6 Cubic Ft. (model 655PMP) \$2,268

8 Cubic Ft. (model 855PMP) \$2,670

Many other models available, call for pricing.

Must have ability to unload off truck upon delivery

Steel Drum Mortar Mixer W/ Electric Motor

6 Cubic Ft. (model 655 PM) \$2,037

8 Cubic Ft. (model 855 PM) \$2,320

Many other models available, call for pricing. Must have ability to unload off truck upon delivery

Stow, Variable speed, 2 Gear Cement Mixer

Item #CX600HF**\$534.95**

- Variable Speed, 2 gear Cement Hand Mixer
- Collomix model#CX600HF
- This is the ideal mixer for mixing up small batches of concrete for GFRC or wet cast, up to 1.5 cu. ft
- 110V 10.4 amp variable speed motor, 1.7HP, 2 speed geared motor
- Mixes up to 17 gallons or 230lbs of cement
- Comes with MK 140HF mixing paddle, Optional mixing stand available

Many other models available!

Flex 2 Speed Cement Hand Mixer \$349.95

Flex model# 502

1 yr. warranty

- 2 Gear, variable speed motor
- 2 speed geared motor
- Mixes up to 17 Gallons or 230lbs of cement
- Comes with 2 Mixing Paddles

Choosing the right mixer

Poly or Steel, Gas or Electric, Mortar or Barrel style drum, how many cubic feet of concrete will a 8 cu ft mixer mix? All good questions and there is a lot to choose from. Give us a call, and we will help you decide what type of mixer fits your needs the best. In the mean time here are some of the basics...

- A poly drum is easier to clean and will not rust. However, the life of the barrel is shorter than a steel drum.
- Gas engines are loud and require maintenance to the engine but can be used without electricity. Electric motors can be used indoors with no concern of fumes.
- Mortar style mixers produce excellent sand mixes where as barrel mixers work well when using larger aggregate. Most concrete countertop manufacturers find the mortar style mixer works best since it works great with sand mixes and good with batches using small aggregates (around 3/8").
- Mixers range in sizes from 2–16 cu. ft. You can assume that the mixer can approximately mix 1/2 of what it is described as. So an 8 cu. ft. mixer can usually mix up to 4 cu. ft. Mixer size describes the size of the barrel/drum if it was filled all the way to the rim.
- A Hand Mixer is a great tool to have whether it is your main or secondary mixer. Many use a hand mixer as their main mixer since they prefer producing smaller batches of concrete. This style of mixer also works well when you are working on small pieces or sample tops since it is much easier to clean and mix small batches quicker and more thoroughly.

Single sided shop/install cart \$295.00

- 40" long x 24" wide x 36" Load Height, 130lbs.
- 24" wide, fits through most door opening
- 7" ledge depth
- 10" diameter pneumatic tires
- 5" diameter swivel locking casters
- 2,000 lb capacity
- Ships UPS

Fabrication/Polishing table \$545.00

- 60" long x 25" wide x 42" Height, 176lbs.
- Lay out complete kitchens by attaching the tables together lengthwise or by attaching them on a 90 degree angle.
- Two built-in end clamps hold the tables together.
- Rubber is mounted on top and the sides where the carts clamp together
- Four heavy duty 5" diameter swivel casters rated at 1,000 lb. each.
- Four foot operated locks hold the table in place.

Slab dollies

- Maneuvers easily indoors and out.
- 3" wide neoprene rubber is easy to clean, prevents slippage and lasts for years
- Pneumatic tires reduce breakage caused by vibration.
- 12" width measured from outside of wheels adds stability.
- 1,000 lb. capacity using 10" tires and 4" casters. 500 lb capacity using 8" tires and 3" casters.

Crete-Lease 880 VOC Gallon

Item #CR458KJAGAL

\$23.95

- Unsurpassed for eliminating bugholes super-plasticized concrete.

Crete-Lease 880 VOC, Aerosol

Item #CR455AERO

\$18.95

- Convenient aerosol can
- Unsurpassed for eliminating bugholes even with super-plasticized concrete.

Spatter Cote 100, Aerosol

Item #S665AERO

\$18.95

- Convenient aerosol can
- Keeps tools and equipment clean and in good working order

Crete-Lease 20-VOC, Aerosol

Item #CR469AERO

\$19.95

- Convenient aerosol can
- Is water based using New Chemistry "Green" technology

Hand-D Heavy Duty Hand Cleaner 8oz flip top

Item #CR815UHT

\$5.95

- Moisturizes dry, cement-sore hands.

Hose Quick Connect Kit

Item #HC1005

\$4.95

- Fits quick connect for Flex Polisher

Dustless 16 Gallon Wet/Dry Vac

Item #DIVAC4823

\$298.95

- Engineered specifically for EXTRA fine dust produced by concrete
- Double filter system
- Filters can be cleaned without removing the lid
- Will not "cough out" dust when started

Disposable Micro Pre Filter bags, 2 pk

Item #DI20001

\$19.95

- Filters to .5 microns
- Makes clean up fast and easy

Steel Finishing Trowel - 14" X 4"

Item #FT14004

\$18.95

Carbon Steel Margin Trowel - 5" X 2"

Item #MT50002

\$9.50

Steel Knife - 6"

Item #JK60001
